

MONTANA DRUG CONTROL UPDATE

This report reflects significant trends, data, and major issues relating to drugs in the State of Montana.

Montana At-a-Glance:

- In 2007-2008, Montana was one of the top ten states for rates in several drug-use categories, including: past-month illicit drug use among persons age 12 or older; past-month illicit drug use among young adults age 18-25; past-month marijuana use among persons age 12 or older; and past-month marijuana use among young adults age 18-25.

 **Source: National Survey on Drug Use and Health (NSDUH), 2007-2008.
- Approximately 10 percent of Montana residents reported past-month illicit drug use; the national average was 8 percent.
- The drug-induced death rate in Montana is higher than the national average.
- Marijuana is the most commonly cited drug among primary drug treatment admissions in Montana.

Drug Use Trends in Montana

Drug Use in Montana: The National Survey on Drug Use and Health (NSDUH) provides national and state-level data on the use of tobacco, alcohol, illicit drugs (including non-medical use of prescription drugs), and mental health in the United States. In the most recent survey, 10.02 percent of Montana residents reported using illicit drugs in the past month. The national average was 8.02 percent. Montana's rate was one of the 10 highest among the states. Additionally, 3.89 percent of Montana residents reported using an illicit drug other than marijuana in the past month (the national average was 3.58 percent).

Drug-Induced Deaths: As a direct consequence of drug use, 132 persons died in Montana in 2007. This is compared to the number of persons in Montana who died from motor vehicle accidents (268) and firearms (139) in the same year. Montana drug-induced deaths (13.8 per 100,000 population) exceeded the national rate (12.7 per 100,000).

Substance Abuse Treatment Admissions Data

Montana Primary Treatment Admissions:

The graph at right depicts substance abuse primary treatment admissions in Montana in 2010. The data show that marijuana, followed by opiates (including prescriptions drugs), is the most commonly cited drug among primary drug treatment admissions in the state.

Prescription Drug Abuse

ONDCP's Efforts to Combat Prescription Drug Abuse

Prescription drug abuse is the fastest-growing drug problem in the Nation. The Administration's Prescription Drug Abuse Prevention Plan, entitled, "Epidemic:

Responding to America's Prescription Drug Abuse

Crisis," provides a national framework for reducing prescription drug diversion and abuse by supporting the expansion of state-based prescription drug monitoring programs; recommending secure, more convenient, and environmentally responsible disposal methods to remove expired, unused, or unneeded

medications from the home; supporting education for patients and healthcare providers; and reducing the prevalence of pill mills and doctor shopping through enforcement efforts.

State-Level Action: Prescription Drug Monitoring Programs (PDMPs)

PDMPs serve a number of functions, including assisting in patient care, providing early warning signs of drug epidemics, and detecting drug diversion and insurance fraud. Thirty-five states have operational PDMP programs established by state legislation and funded by a combination of state and Federal funds. An additional 13 states have a prescription drug monitoring program authorized, but not yet operational. Adequate resourcing, increasing the number of states with operational PDMPs, and development of state-to-state information-sharing systems would significantly help reduce prescription drug diversion and abuse.

On April 21, Governor Brian Schweitzer signed **SB 83**, authorizing the establishment of a Prescription Drug Monitoring Program to monitor the prescribing and dispensing of Schedule II-V controlled substances, Montana's PDMP will be overseen by the Montana Department of Labor and industry.

State-Level Action: Drug Take-Back Programs

A comprehensive plan to address prescription drug abuse must include proper disposal of unused, unneeded, or expired medications. Providing individuals with a secure and convenient way to dispose of controlled substances will help prevent diversion and abuse of these substances and demonstrate sound environmental stewardship. Federal rulemaking is underway and will further enhance the viability and scope of state and community take-back programs. In the meantime, states are encouraged to work with the DEA to conduct additional take-back events and educate the public about safe and effective drug return and disposal.

Drugged Driving

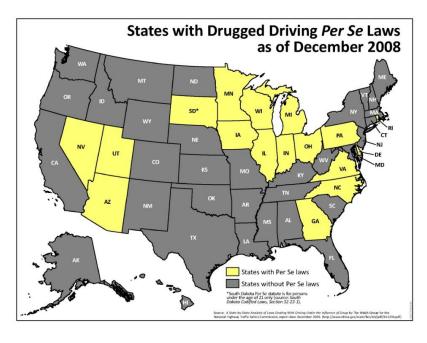

ONDCP Action on Drugged Driving

In 2007, the National Highway Traffic Safety Administration (NHTSA) found that one in eight weekend, nighttime drivers tested positive for illicit drugs. According to recent Fatal Accident Reporting System (FARS) data, one in three motor vehicle fatalities (33 percent) with known drug test results tested positive for drugs in 2009. Recognizing this growing problem, ONDCP is working to raise awareness of the dangers of drugged driving, provide increased training to law enforcement in identifying drugged drivers, and encourage states to consider *Per Se* laws to facilitate effective enforcement and prosecution of those who drive with drugs in their systems.

State-Level Action: Enacting Per Se
Standards for Impairment Although all 50
states have laws against drugged driving, law
enforcement often lacks adequate tools to
enforce and prosecute drugged driving.
ONDCP encourages states to develop and
implement Per Se standards that make it
illegal to drive a vehicle after taking illegal
drugs. This is the same standard used
successfully for 12 million commercial drivers
in the United States during the past two
decades. Per Se standards have been adopted
in seventeen states.

Montana does not have a Per Se standard.

However, under Section 61-8-401 of the Montana Code Annotated, it is unlawful and punishable for any person who is under the influence of a dangerous drug, any other drug, or alcohol and any

dangerous or other drug, to drive or be in actual physical control of a vehicle within the state. Proof required: that the defendant was driving or was in actual physical control of a vehicle in Montana, had taken into their body a drug or a dangerous drug, or as a result of taking the drug into their body, the defendant's ability to safely operate the vehicle was diminished.

ONDCP Support for Community-Based Prevention

National Anti-Drug Media Campaign

ONDCP's National Youth Anti-Drug Media Campaign provides consistent and credible messages (including those in Native American and Alaska Native communities) to young people about drug abuse and its consequences. *Above the Influence*, a major component of the Campaign, informs and inspires youth to reject illicit drugs and drinking via a mix of national and local advertising vehicles. The Campaign, in close partnership with local community-based, youth-serving organizations, also conducts teen-targeted *Above the Influence* activities to assist local groups with youth drug prevention work in their respective communities.

The Drug Free Communities (DFC) Program

Recognizing that local problems require local solutions, Drug Free Communities (DFC) organizations mobilize communities to prevent youth drug use by creating local data-driven strategies to reduce drug use in the community. ONDCP works to foster the growth of new coalitions and support existing coalitions through the DFC grants. In FY 2011, the following Montana coalitions received grants from ONDCP:

- Butte Cares, Inc.
- Phillips County Coalition for Healthy Choices
- Ravalli County Prevention Coalition
- Richland County Partnership for Promise
- Roots of Promise: Alliance for Children and Families
- Teens Against Drugs and Alcohol (TADA) (Superior)
- Youth Connections (Helena)
- Sheridan County Youth Action Council/Community Incentive Program

ONDCP High Intensity Drug Trafficking Area (HIDTA) County Info

The High Intensity Drug Trafficking Areas (HIDTA) program enhances and coordinates drug control efforts among local, state, and Federal law enforcement agencies. In designated HIDTA counties, the program provides agencies with coordination, equipment, technology, and additional resources to combat drug trafficking and its harmful consequences in critical regions of the United States.

Montana (Rocky Mountain HIDTA): Cascade, Flathead, Lewis and Clark, Missoula, and Yellowstone counties.

The Rocky Mountain HIDTA operates out of Denver, Colorado, and encompasses 34 counties in four states: Montana, Colorado, Utah, and Wyoming. The HIDTA provides funding, an information sharing system, training, and coordination for an increased emphasis on criminal interdiction by the Montana State Patrol, and investigative follow-up by allied agencies in an "all crimes" approach. The HIDTA region's extensive interstate highways link major drug sources in Mexico and Canada to major US domestic drug markets. Mexican drug trafficking organizations (DTOs) are the principal suppliers of wholesale quantities of methamphetamine, marijuana, cocaine, and black tar heroin, while West Coast Asian DTOs supply highpotency marijuana and MDMA from Canada. The distribution and abuse of Mexican methamphetamine pose the greatest drug threat to the region. Mexican ice methamphetamine trafficking and abuse are increasing, while domestic methamphetamine production is declining.

- The Rocky Mountain HIDTA is currently developing a much-needed commercial vehicle criminal interdiction training course for the Montana State Patrol.
- The HIDTA is also working with the International Association of Law Enforcement Intelligence Analysts (IALEIA) to create a Rocky Mountain Chapter to enhance intelligence analyst skills, knowledge, and exchange of information.

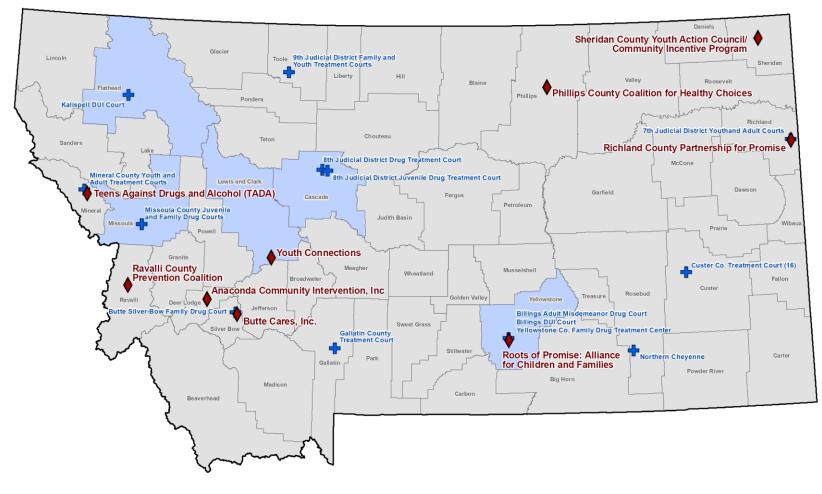

Federal Grant Awards Available to Reduce Drug Use in the State of Montana

The Federal Government awards competitive grants to help states in their efforts to reduce drug use and its harmful consequences. In FY 2010, direct support was provided to state and local governments, schools, and law enforcement organizations in your state for this purpose. Some Federal grant programs are dedicated to reducing drug use and its harmful consequences, while others can be used for reducing drug use or for other purposes. In FY 2010, your state received support under the grant programs shown below.

Federal Grant Awards	
	2010
Department of Education	0.570.04
Safe and Drug-Free Schools and Communities_National Programs	2,573,34
Alcohol Abuse Reduction Grants	269,119
Building State And Local Leadership Capacity for Preventing Youth Substance Use and Violence	122,34
Safe Schools/Healthy Students Grants	2,181,88
Department of Health and Human Services	
Administration for Children and Families	2,465,49
Enhance the Safety of Children Affected by Parental Methamphetamine or Other Substance Abuse	1,000,00
Promoting Safe and Stable Families	1,465,49
Immediate Office of the Secretary of Health and Human Services	300,00
Family and Community Violence Prevention Program	300,00
Indian Health Service	982,31
Urban Indian Health Services	982,31
National Institutes of Health	71,25
Drug Abuse and Addiction Research Programs	71,25
Substance Abuse and Mental Health Services Administration	13,952,23
Block Grants for Prevention and Treatment of Substance Abuse	6,744,71
Projects for Assistance in Transition from Homelessness (PATH)	300,00
Substance Abuse and Mental Health Services_Projects of Regional and National Significance	4,540,68
Substance Abuse and Mental Health Services-Access to Recovery	2,366,84
Department of Housing and Urban Development	
Assistant Secretary for Community Planning and Development	343,74
Shelter Plus Care	343,74
Department of Justice	,
Office of Justice Programs	5,952,14
Community Capacity Development Office	157,00
Congressionally Recommended Awards	1,085,000
Criminal and Juvenile Justice and Mental Health Collaboration Program	152,50
Drug Court Discretionary Grant Program	1,006,91
Edward Byrne Memorial Justice Assistance Grant Program	2,226,33
Enforcing Underage Drinking Laws Program	356,40
Harold Rogers Prescription Drug Monitoring Program	49,90
Juvenile Accountability Block Grants	330,20
·	
Juvenile Mentoring Program	238,59
Recovery Act - Eward Byrne Memorial Justice Assistance Grant (JAG) Program	13,04
Residential Substance Abuse Treatment for State Prisoners	171,06
Second Chance Act Prisoner Reentry Initiative	165,18
Executive Office of the President	
Office of National Drug Control Policy	763,08
High Intensity Drug Trafficking Area Program	763,08
Substance Abuse and Mental Health Services Administration	929,220
Drug-Free Communities Support Program Grants	929,220
Grand Total	28,332,83

Note: Report as of 11/30/2010. FY 2009 includes additional grant awards under the Recovery Act. The Federal, State and Local Shares of Medicaid and the Federal Medicare Programs are not included above. File updated 06/07/2011.
